Directive 10/2016

Nature and Type of License of Premises

According to section 11(b) of the Betting Law 2012, N. 106(I)/2012 (“Law”), the National Betting Authority (“Authority”) has the power to draw up and issue regulations and Directives to ensure the best possible implementation of the Law. Directive No. 10/2016 is drawn up on the basis of the provisions of section 35(e) of the Law, which concern the nature and type of the license for the premises and set out that the license for the premises authorises the use of the premises for the provision of Class A betting services, and prescribes the layout of the premises.

2. As a consequence, the Authority clarifies that in the event that the Class A recipient or the authorised representative intends to carry out any alternations to the premises, for which a license for premises has been obtained, they are obligated to submit a relevant application which is fully justified to the Authority for approval purposes.

3. According to section 42(1) of the Law, the Authority may suspend a license for the premises in the event that it is ascertained that the Class A license recipient or an authorised representative fail to comply with any license term.
